**Why it's Awesome:** The crack of a pool cue and the faint sounds of an arcade machine aren't really synonymous with work. But at Zion & Zion's offices where dogs can roam with the people, the office really is like a second home. Its board room boasts a regal feel and there are thousands of square feet of whiteboard wall that's mixed in with technology. You'll really feel like it's the future here as you utilize touch screens, room wizards and more. ■■■
